Commit! The Need for a Regional Strategic **Effort**

"Our Kids. Our Tomorrow."

July, 2012 www.commit2dallas.org

Commit! - Dallas County's "Backbone" for Education Our Core Beliefs, Vision, Purpose and Process

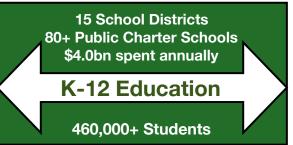

Our Core Beliefs	Education is the most effective ladder to realizing one's full potential. Every child is capable of learning and deserves the opportunity to succeed. The potential of our children is a resource that we cannot afford to waste. Working together, we will create a thriving community.
Why Do We Exist?	We Exist to Help Maximize Every Child's Full Potential Through Education
How Do We Effect Change?	We help connect and catalyze the community to set meaningful goals and implement measurable strategies to substantially advance Dallas County educational outcomes, cradle to career.
What Do We Do?	We are the trusted partner that helps connect institutions and provides the data, information, and support needed to identify, share and scale the most impactful educational practices in our region.

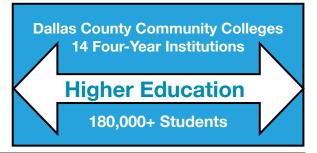

Needed Collaboration within Commit! Community Substantial Number of Parties to Help Coordinate and Align

The Need for a Backbone Organization Supporting Regional Collective Impact

- 1. Tremendous number of entities focused on education generally operating independently.
- 2. Collaborative efforts rarely used among existing individual organizations due to lack of funding to support coordination and lack of internal capacity to execute.
- 3. Separate "backbone" organization increases collective capacity and coordination of entire industry to spread best practices, use data to strategically align resources, encourage and support collaborative networks to move key indicators, etc.

Various Non-Profits and Community Stakeholders Seeking to Support Including:

Parental
Engagement
and
Education

Pre-K Education In School/ Out of School Programs

Tutoring and Mentoring

College
Access and
Persistence

Health and Nutrition

Teacher and Principal Training Business and Foundation Community

Overview of Commit! as a Regional "Backbone" What Will Be Its Goals and its Benefits?

Measure What Matters via Clear Community Scorecard

- Move away from simplistic state ratings to measuring what matters
- · Increased funder confidence in what they're strategically affecting
- Develop a common language that all stakeholders include in planning.

Help Scale Practices Proven by Data as Most Effective

- Periodically convene educators and share data/best practices
- Evaluate data on practices by non-profits/assist scaling what works

Help Coordinate/Align Community Resources

- Support effective existing collaborations and help develop others
- Encourage thoughtful resource deployment along Age 0-22 continuum

Advocate for Entire Community (~10% of State) What Works

- Strategic funding for early childhood, K-12, college readiness/access
- Amend policies to improve district effectiveness/accountability system

Continuously Communicate to Community

- Annual scorecard will reflect community progress/remaining challenges
- More community urgency to act/support public education given clarity

Indicators Our Community Will Move to Help Every Child Realize Their Full Potential

- 1. Kindergarten Readiness
- 2. 3rd Grade Reading
- 3. 4th Grade Math
- 4. 8th Grade Science
- 5. 8th Grade Math
- 6. 10th/11th Grade Pre-SAT/ACT
- 7. Pct. of 12th Grade with College Ready SAT/ACT
- 8. High School Graduation Rate
- 9. Post-Secondary Enrollment
- 10. 1st Yr. Post-Secondary
 Retention Rates
- 11. Post Secondary Graduation
 Rates within 150% of
 Expected Timing

Focus will include closing all achievement gaps based on socioeconomic, ethnic or gender status.

Near Term Objectives of Commit! What We Hope To Accomplish by Q1 2013

Measure What Matters

• Publish 2011-12 Annual Community Scorecard

Scale Effective Practices

Select three prioritized indicators (inclusive of Kindergarten Readiness)
 and stagger the launch/support of collaborative action networks for each

 Publish and distribute at least three case studies regarding area outlier performance to educational partners

Coordinate Community Resources

- Secure partnership commitments of various educational partners, civic entities, foundations and businesses to the Commit! effort
- Support/assist in the creation of a report which provides overview of local foundation activity directed toward education

Advocate For What Works

 Develop advocacy agenda for 2013 state legislative session with input of various partners

Engage The Community

- Support the creation of an area-wide marketing campaign to attract quality human capital to our region and link inquiries to partner HR sites
- Facilitate 5+ new school adoptions by business/private schools.
- Expand the communication channels and reach of the Commit! network

Becoming an Educational Partner Within Commit! What Each Party Commits to the Community

Educ. Partner Obligations

- Share data on 11 indicators
- Establish goals for 2015/2020
- Convey data to (i) non-profit partners to help them prove effectiveness/scale and (ii) other ed partners to align their efforts
- Share best practices and attend convenings where other practices can be shared
- Assign key professionals to key committees if asked
- Provide input on desired legislation for Commit! to advocate on behalf of entire community

Measure What Matters

Scale Effective Practices

Advocate for What Works

Commit! Obligations

- Publish an annual scorecard beginning Q1 2013 highlighting community progress toward goals
- Provide benchmarking/outlier analysis upon request vs. peers
- Publish/share best practice case studies to entire community
- Grow area support from foundation/business community
- Assist scaling of most effective early childhood providers
- Convene area representatives/ create legislative scorecard/ advocate for community in Austin
- Create website to market region on national basis to educators interested in innovation

The Projected Timeline of Commit! Thoughtful and Deliberate Seeking Meaningful Input

Oct 2011 -Dec 2011 Jan 2012 -Jun 2012 July 2012 -Dec 2012

Jan 2013 -

- Form Strategy Committee
- Engage data research
- Determine community indicators
- Create website
- Commence hiring

- Commence engagement efforts (superintendents, higher ed, mayors, non-profits, media, etc.)
- Incorporate Commit/ commence 501(c)3 process
- Continue hiring
- Broaden community communication
- Secure office space/ build out organization

- Continue efforts to engage/seek input and buy-in
- Achieve 501(c)3 status/complete fund raise; form board
- Complete staff hiring
- Commence network creation/support efforts
- Start collection of best practice case studies to share in hopes of scaling

- Publish 2011-12 school year scorecard
- Continue network creation/support efforts
- Measure progress/ implementation of best practices
- Commence advocacy efforts in Austin during legislative session

Education Across Dallas County Why a Regional Approach?

- Commit! has defined its community as Dallas County, encompassing roughly 2.5 million residents and over 800,000 students involved in early childhood, public K-12 and higher ed education. With roughly 10% of all public school school students in the nation's second largest state, the ability to make a meaningful impact is substantial.
- The city of Dallas encompasses multiple school districts including Dallas ISD, Richardson ISD, and Carrollton-Farmers Branch ISD.
- Numerous other Dallas County cities are located in multiple school districts;
 Dallas ISD encompasses 15 cities alone including Addison, Balch Springs, Carrollton,
 Cockrell Hill, Combine, DeSoto, Duncanville, Farmers Branch, Highland Park, Hutchins,
 Lancaster, Mesquite, Seagoville, University Park, and Wilmer.
- Over 80,000 students are educated in a **community college system which is Dallas County based;** this higher ed system is the single largest destination of DISD graduates.
- Students in lower income communities can be highly mobile and will often change school districts within the region in their family's search of better housing or employment.
- A regional approach allows us to capture the best practices from numerous providers vs. a sole focus on one entity.

Education Across Dallas County Large and Complex with Numerous Challenges

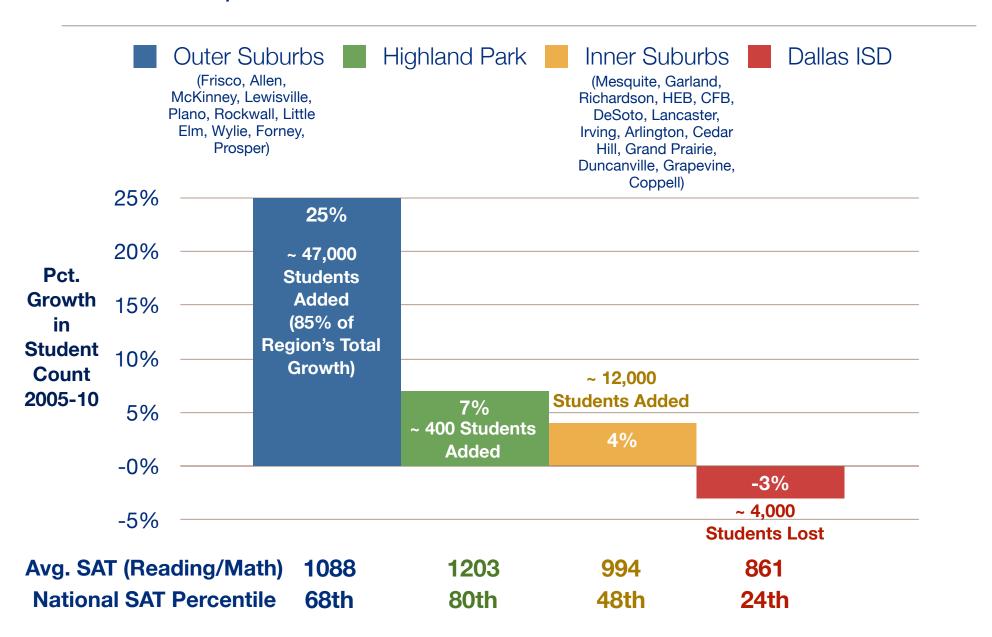

- Dallas County students are educated by 1,500+ early childhood providers, 15 ISD's, 80 different charter schools and numerous 2-year and 4-year institutions. They are further supported by over 300 different non-profits focused on in-school/out-of-school support.
- These entities tend to operate in a fairly **independent (vs. collaborative) fashion,** with less-than-optimal **sharing of data or best practices** or a coordination of their independent strategic plans.
- 91% of all K-12 students regionally are educated in public schools; any successes in private schools are dwarfed by the educational outcomes in our traditional and charter public schools
- Approximately 70% of students attending Dallas County public schools are economically disadvantaged. That number has grown meaningfully in the last five years, bringing with it all of the numerous obstacles (hunger, substance abuse, homelessness, etc.) that often accompany poverty. Even if we optimistically assume that no poverty exists within our private schools, that means that 60% of ALL K-12 students are considered poor. The resulting pressure placed on our educators is substantial.
- Our **overall academic outcomes within our community are weak**, hindered by **significant achievement gaps** that already exist the day a child starts in Kindergarten given the substantial disparities in early childhood education.
- Based on our historically poor collective success in academically preparing our Hispanic and African American children, the **approaching demographic wave will only exacerbate our region's problem.**
- The possibilities of the American Dream historically made possible thru education appear to many to have faded, not expanded. An urgent, "all hands on deck" approach is required.

The Urgency Behind Commit! The Economic Argument

- In 2009 and in 2010, roughly **5,000 students** in a Dallas County public school who started 9th grade together four years earlier **failed to graduate from high school, almost 20% of all students.**
- With the average college graduate earning roughly \$1.0 million in their lifetime more than a high school dropout, the ultimate cost to our region of each 9th grade cohort's failure to graduate from high school and subsequently achieve some type of post secondary education is over \$5.0 billion.
- Per numerous estimates, roughly **60% of adults need to have a post secondary degree** by 2030 to meet the needs of our evolving labor market. Our region is currently **less than 30%**; our pipeline of students leaving high school who are post secondary ready is unfortunately a fraction of that number.
- By 2040*, if current educational attainment trends persist, Texans will experience the following:
 - \$15 billion decline in state tax revenue, roughly 15% of 2011's total amount
 - 15% increase in number of households living in poverty;
 - Increase of 100,000 in prison population and an additional \$1.5bn per year in incarceration costs
- Real community urgency is required regarding the strategic coordination of efforts and providing increased resources to education (both in and out of classroom) with real transparency on results.
- Doing nothing or tweaking at the edges are not realistic options.

^{*} Note: State of Texas' Report of the Select Commission on Higher Education and Global Competitiveness January 2009; Steve Murdock, Institute for Demographics and Socioeconomic Research, UT-San Antonio.

Area Public School Enrollment Growth 2005-2010 Broad Disparities Correlated to Academic Outcomes

Achieving a Goal for Post Secondary Completion 60% Required to Compete in a 2030 Labor Market

GOAL 1: 90% of **Students Graduate** from High **School Post** Secondary Ready

GOAL 2: 90% of H.S. **Graduates** Access **Post Secondary Education**

GOAL 3: 75% of **Enrolled Students** Complete **Post** Secondary **Education**

DESIRED RESULT: 60% of H.S. **Students Achieve** Post **Secondary Degree**

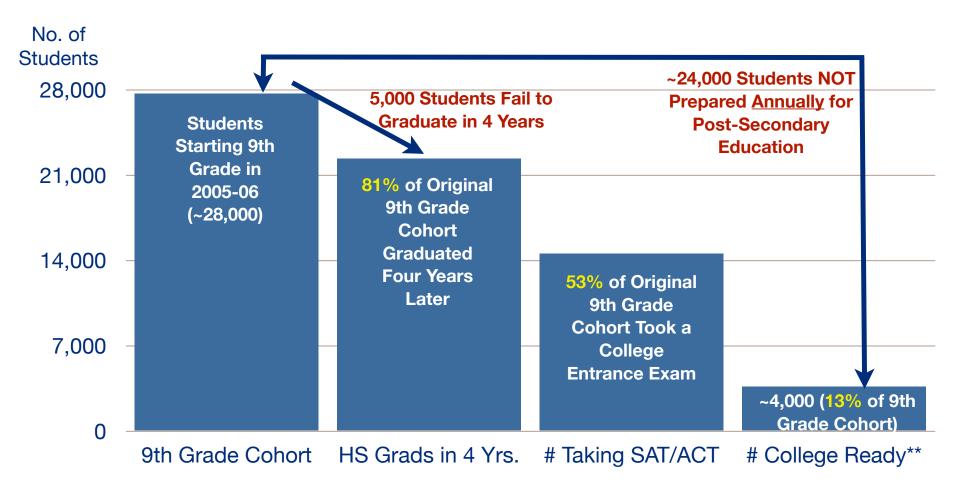

90%

x 90% x 75%

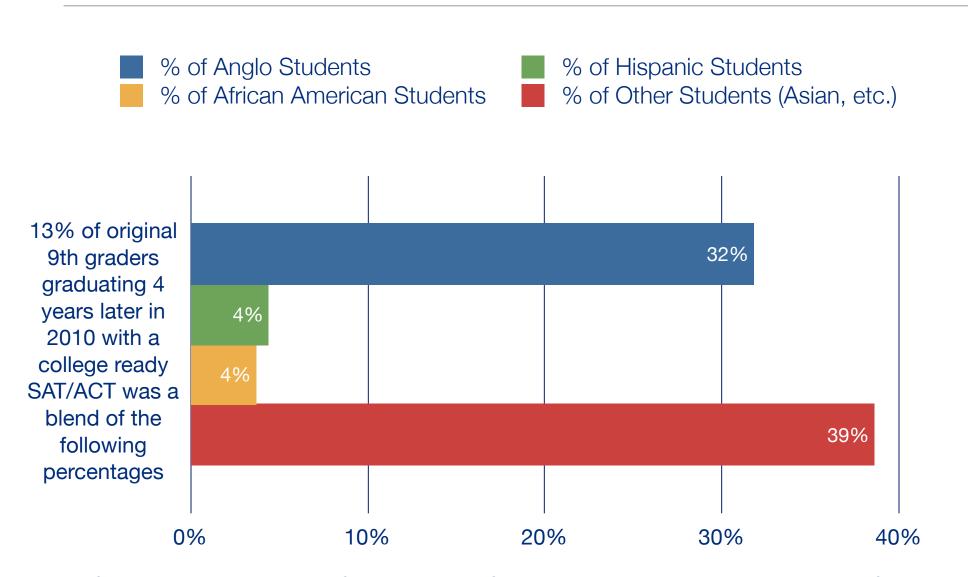

Across Dallas County Public Schools, We're Far From 90% Goal Outcomes for 9th Grade Cohort Graduating in 2009

High School Class of 2009 Commencing 9th Grade in 2005-06 School Year

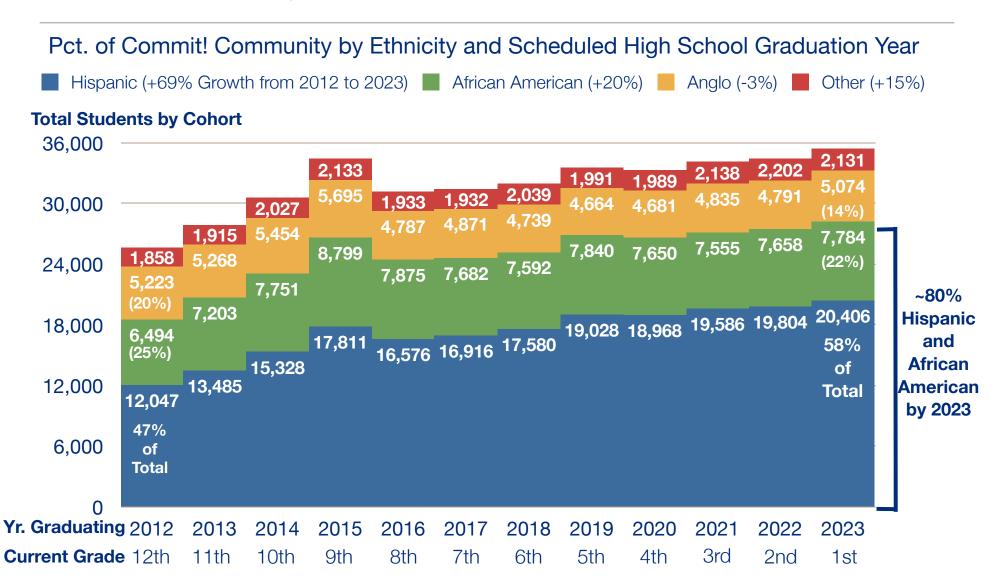

^{**} Source: Texas Education Agency AEIS Report 2010-11. College Ready defined as SAT of 1110 on Reading/Math components or an ACT composite score of 24. Numbers exclude students from numerator and denominator who can be identified as moving elsewhere.

% of Community Graduating with College Ready SAT/ACT Shortfalls Across All Ethnicities

Source: Texas Education Agency AEIS Reports 2010-11 for Commit! community of 15 public school districts in Dallas County.

The Regional Demographic Wave Coming in Future Years Our Fastest Growing Populations Reflect our Lowest Readiness Levels

Source: Texas Education Agency AEIS Reports 2010-11 for Commit! community of 15 public school districts in Dallas County.

If Trends Continue, Disastrous Regional Consequences Number of Students Not College Ready Will Equal Entire City Populations

	Hispanic Students	African American Students	Anglo Students	Other Students	Totals/ Weighted Avg
Total No. of Public School Students Currently Enrolled Across Grades 1-12 Scheduled to Graduate During Period 2012-23	207,535	91,883	60,082	24,288	383,788
Recent % of Students by Ethnicity Demonstrating College Readiness	4%	4%	30%	39%	10%
Resulting Total Students NOT Attaining Post Secondary Readiness by H.S. Graduation	199,234	88,208	42,057	14,816	344,314**

Sample Cities	2010 Population
Mesquite	139,824
DeSoto	49,047
Cedar Hill	45,028
Duncanville	38,524
Lancaster	36,361
University Park/Highland Park	31,632
Total	340,416

** If trends continue, the projected number of current <u>public</u> school students (who are 91% of all students) graduating over the next 12 years WITHOUT post-secondary readiness will exceed the entire current populations of the sample seven cities

COMBINED.

Commit! The Region's Backbone Infrastructure

Commit! Frequently Asked Questions

What is Commit!?

A separate 501c(3) serving as a backbone organization helping to coordinate, align and improve the numerous educational efforts across the region

What is Commit!'s Expected Time Frame?

Given the scale, complexity and challenges of the mission, it is anticipated that Commit! will exist for 10+ years

How Will Commit! Be Funded?

A combination of regional and national foundations will serve as the organization's initial primary funders.

Will Commit! Be Driven by Any One Organization or Person?

No. Commit! will be governed by a broad, independent council consisting of representative partners (educators, foundations, non-profits, etc.)

What Will Commit! Be Known For?

Impartial trusted source of robust data
Valued connection point for all things educational
Convener knowledgeable and capable of catalyzing
and supporting scaling of best practices regionally

Commit! Modeled on Similar Educational Collaboratives Regional and National Examples

E3 Alliance (www.e3alliance.org) - Central Texas (established 2007)

All Kids Alliance www.allkidsalliance.com) - Greater Houston Area (8 county network - est. 2011)

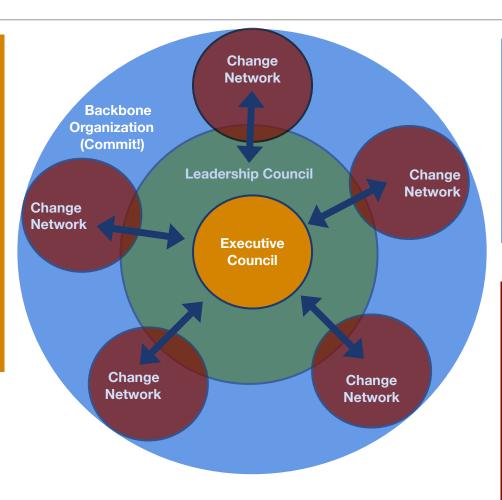

- Strive Network (www.strivenetwork.org -goal of 25 Cradle-to-Career communities by 2015)
 - Cincinnati, OH (established 2006)
 - East Bay/Oakland, CA
 - Richmond, VA
 - Milwaukee, WI
 - Boise, ID
 - Portland, OR

Network enables members to share expertise, identify and adapt programs that work and develop effective tools and resources that can be brought to bear on specific challenges.

Commit! Building a Lasting Civic Educational Infrastructure

Executive Council:
Comprised of core
cross-sector leaders
from within the
Leadership Council;
provides strategic
guidance; members
possess the
authority to leverage
significant financial
and/or social capital
to advance overall
Commit! goals and
outcomes; key
public champions.

Leadership Council: Executive-level leaders from educational institutions, businesses, non-profits, foundations; *drives collaborative action*; use authority to align and broker resources to implement strategies; promote and report data to Commit! partnership and public

Backbone Organization: As neutral entity, Commit! provides key staff and data support, communicates and works across sectors to eliminate silos and help scale best practices, and has convening power to ensure that key leaders will consistently come to the table over time.

Change Networks: Comprised of existing/emerging groups and coalitions, including stakeholders, practitioners, and issue experts.

Specific responsibilities include:

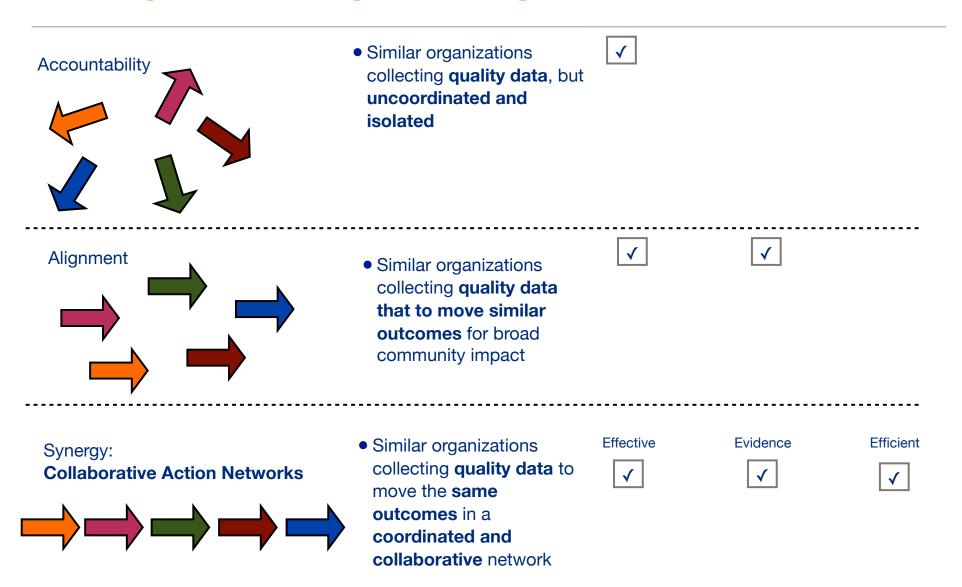

1) Identify initial contributing indicators and commit to integrating these indicators into own performance tracking;

2) Identify successful strategies and commit to integrating into practice/program

3) Communicate progress to

3) Communicate progress to Leadership Council

How Commit!'s Helps Effect Change Shifting the Paradigm Through Network Creation

^{*} This document is meant to be a conceptualization of the context of academic and social programming which impact student success. Adapted from Strive.

Engaging Change Networks Featuring Collaborative Action

Strategies to Solicit Participation

Invitation to Engage

Used when: No Collaborative Change Networks Exist

Invites practitioners, funders, or other stakeholders whom impact an identified Partnership priority outcome to engage with the Partnership and form a collaborative action change network. Should include workshops to familiarize potential network members with the roles and responsibilities of a network and the process of continuous improvement.

Request for Engagement

Used when: Some Form of Change Networks Exist

Invites existing networks to engage with the Partnership and morph into a collaborative action change network. May require that existing networks include additional members, identify a Priority outcome the network plans to impact, and commit to sharing and using data for continuous improvement.

Request for Support

Used when: Collaborative Action Change Networks Exist

Outlines different types of support that the Partnership can provide to Collaborative Action Change Networks and asks networks to respond with what types of support they need to complete and implement an action plan.

Why We Need Our Own Scorecard to Measure Academic Progress within the Commit! Community

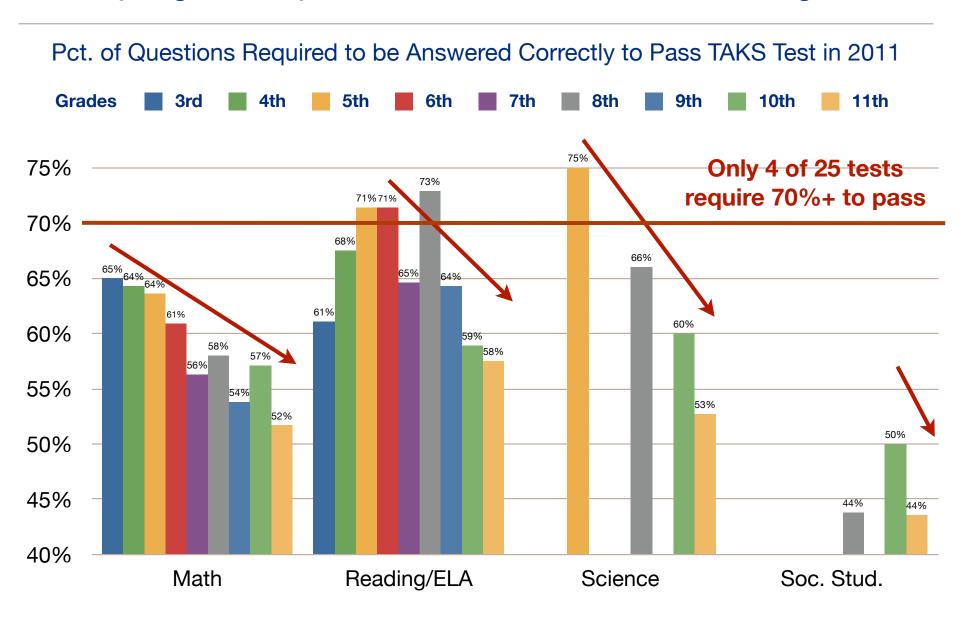

Hard to Know Where We Are if State Standards Continually Move We Can't Be Twice as Exemplary (or Not) in One Year's Time

Pct. of Schools Statewide Receiving Highest and Lowest Ratings per State of Texas

^{*} Note: In 2008-09 and 2009-10, TEA instituted a "growth adjustment" which effectively meaningfully reduced the score required to pass each state TAKS tests. The adjustment was removed in 2010-11.

Passing TAKS is **NOT** College Ready - Truth Behind the Scores Difficulty Significantly Eases in Later Grades for Passing Rates

Measuring Academic Progress Criteria for Selecting Key Indicators Along the Path

Must be produced by a **trusted source**.

Must track data at appropriate intervals along the 0-22 spectrum.

Must be **few enough to not overwhelm reader** with data.

Must include meaningful % of nationally normed data/3rd party verification (i.e. college acceptances).

Must be **easily understood** with common meaning by community.

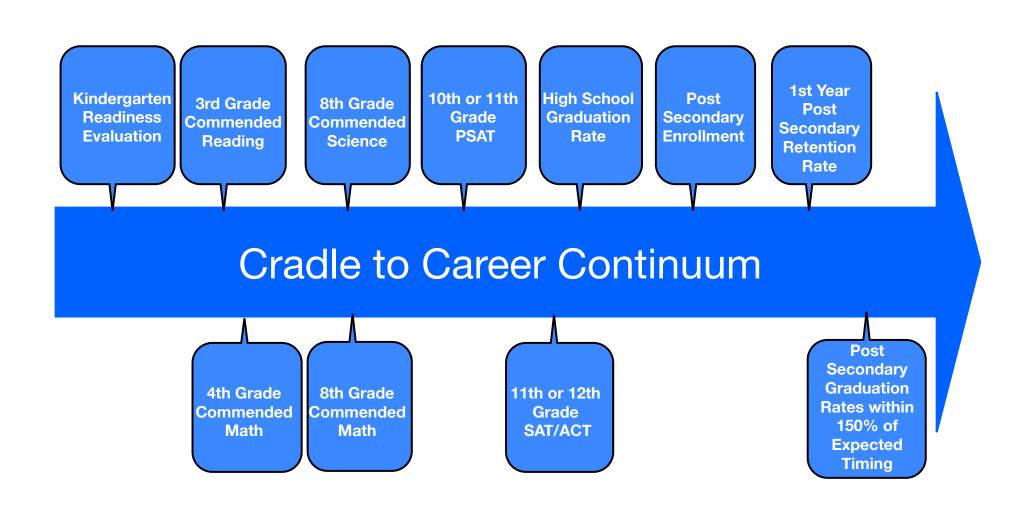

Must be **reasonably similar** across institutions.

Must be **affordable and easy to gather** and report.

Must be **timely reported** and consistently available.

Must be **significantly alterable** by local action.

Commit!'s Cradle to Career Continuum Outline of 11 Indicators Measuring Community Progress

Collective Commit! K-12 Community

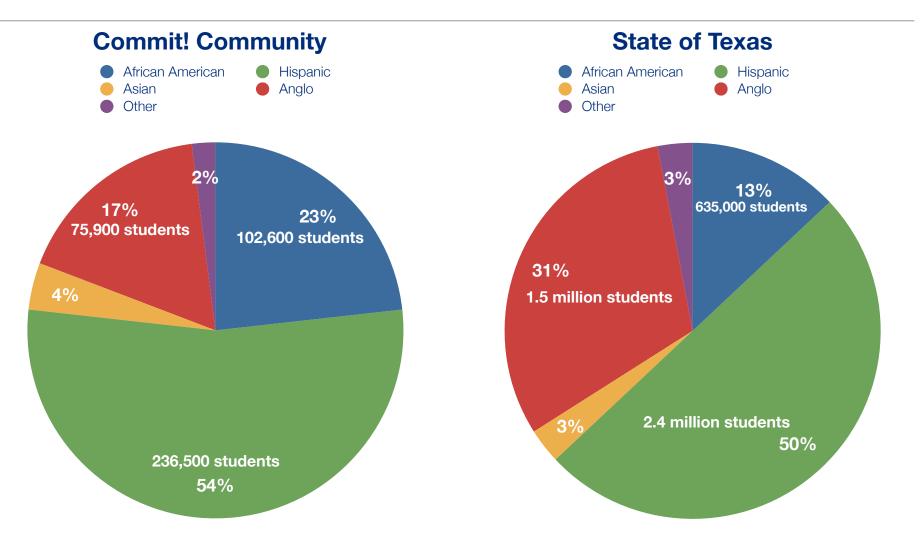

15 School Districts, ~446,000+ Students Enrolled in 2010-11 School Year

				Student Demographic Data 201-11 School Year

Examples of Outlier Performance Among 30 Largest Local Districts What is Each District Doing? How Can Its Best Practices be Shared?

District	Rank in % of Non Econ. Disadvantaged Students	Outlier Performance
District A	30th (87% F&R Lunch)	9th in % Taking AP Tests; 12th in Dual Enrollment Completion; 11th in % Taking SAT/ACT; increased four year graduation rate from 68% to 75% in one year
District B	29th (81% F&R Lunch)	8th in % Taking SAT/ACT; increased 8th grade Math and Science Commended rates 9 and 13 pts, respectively from 2009-10 to 2010-11 school years
District C	28th (81% F&R Lunch)	Increased 4-year graduation rate from 78% to 83% in one year; 18th in % Taking SAT/ACT
District D	25th (72% F&R Lunch)	Increased 4-year graduation rate from 75% to 84% in one year; 11th highest completion rate
District E	24th (66% F&R Lunch)	4th in % Taking SAT/ACT; 13th in average attendance rate
District F	23rd (65% F&R Lunch)	17th in Math and Science commended rates; 14th in 4-Yr. Graduation Rate; 5th highest attendance rate
District G	18th (tie) (57% F&R Lunch)	8th in Math and Science commended rates; 7th in % Taking AP Tests and SAT/ACT; 10th highest in average SAT and ACT score; 9th in % of students with college ready entrance exam
District H	18th (tie) (57% F&R Lunch)	2nd in % Taking SAT/ACT; increased 8th grade Science commended rates by 11 pts (37% to 48% from 2010 to 2011 school year)
District I	6th (20% F&R Lunch)	2nd in % Taking AP Tests; 3rd in % Taking SAT/ACT; increased 8th grade Science commended rates by 4 pts (41% to 45% from 2010 to 2011 school year)

Commit! Discussion of Early Childhood and Kindergarten Readiness

"All Things Lead to the Beginning"

Commit! Why start early?

What brain research shows?

- At birth, all children are born with approximately the same number of neurons or brain cells, yet only 25% of the neurons are "online".
- With **stimulation**, (i.e. exposure to new objects, sensory input, experiences, and words) more brain cells are **activated**.
- With multiple and varied experiences, the brain cells make more connections and become faster, thus leading to new, more complex learning and memories.

THE PROBLEM: Use it or Lose it!

- Beginning at age 3, the brain starts pruning or eliminating unused brain cells.
- Kindergarten doesn't start until age 5 or 6.

Commit!

Defining "Kindergarten Readiness":

Five Domains of KR:

1. Social/Emotional

Self regulating of behavior and follows classroom rules

2. Language and Communication

Child uses a wide variety of words to label and describe people, places, things and actions

3. Emerging Literacy: Reading

Child produces the correct sounds for at least 10 letters

4. Emerging Literacy: Writing

Child independently uses letters or symbols to make words or parts of words (including own name)

5. Numeracy

Child counts up to 10 items and demonstrates that the last count indicates how many were counted

Early Childhood Ed and Kindergarten Readiness What Are the Challenges?

- Huge Population As of the 2011 Census projection,
 ~230,000+ children ages 0-5 live in Dallas County.
- Incredibly Fragmented Number of Providers There are over 1,500 regulated child care facilities in Dallas County. Approx. 45% are child care centers and 55% are licensed or registered childcare homes.
- Broad, Disparate Level of Quality Of the 1,516
 regulated child care facilities, only 206 (14%) are
 recognized by Texas Rising Star, NAC or NAEYC for
 quality. Roughly 25% of County zip codes have NO
 recognized facilities.
- Lack of Longitudinal Tracking Public school districts do not track where, if anywhere, their students received early childhood education. Early childhood providers do not track their alumni. As a result, data cannot be used to help scale the most effective practices.
- Determining Kindergarten Readiness Currently, districts give a broad number of literacy tests to determine Kindergarten Readiness. Comparisons are difficult as 15 school districts within Commit! administer 14 different tests at varying points during Kindergarten.

Commit! Early Childhood

Where do we go from here?

- 1. Create true partnership and communication between the districts and early childhood stakeholders in the 0-5 space.
- 2. Adequately **define Kindergarten Readiness and consistently assess** students across districts.
- 3. Collectively advocate for a **multidimensional assessment** of Kindergarten Readiness to be aded to the state Commissioner's List of Literacy tests.
- 4. Collaborate to **create a data system** that adequately tracks students from early childhood providers who served them consistently for more than 6 months to Kindergarten Readiness skills.
- 5. **Initiate Collaborative Action Networks** that actionably address, through continuous collection and review of data, the most significant school readiness factors impacting children in their earliest years.
- 6. Collectively **direct efforts** toward what works.
- 7. Close the achievement gap before the kids reach school age.
